

MobileAlert Pendant

Our **MobileAlert Pendant** is water-resistant, has GPS and Fall Detection, use At-Home, On-The-Go or anywhere in the United States.

If you need **HELP** just push the button, works anywhere in the United States.

What happens when you press button?

1. Monitoring Station gets notified of emergency signal and location.
2. Customer and Emergency Contacts get notified automatically via text message and/or email that customer activated alarm.
3. Monitoring Station and Customer communicate through 2-way audio on pendant and assess situation.
4. Monitoring Station pinpoints your location and Emergency Authorities are dispatched to that location if necessary.
